

## LJS3106 0.6T SCISSOR LIFT

The DaTo LJS3106 0.6T Scissor Lift with Bed is a compact and powerful hydraulic lifting solution designed for automotive workshops. With a 600kg capacity and up to 3000mm lift height, it ensures efficient vehicle handling, smooth operation, and space-saving installation.

### Specification

| Parameter              | Details                  |
|------------------------|--------------------------|
| Model                  | LJS3106                  |
| Drive Type             | Electro-Hydraulic        |
| Max Capacity           | 600 kg                   |
| Max Lift Height        | 3000 mm                  |
| Initial Height         | 790 mm                   |
| Platform Length        | 3000–3500 mm             |
| Platform Width         | 1300 mm                  |
| Lifting Time           | ≤ 50 seconds             |
| Descent Time           | ≤ 60 seconds             |
| Machine Weight         | 730 kg                   |
| Power Supply           | AC 400V / 230V ±5%, 50Hz |
| Motor Power            | 2.2 kW                   |
| Hydraulic Oil Capacity | 2 L                      |
| Working Temperature    | 5°C – 40°C               |
| Humidity Range         | 30% – 95%                |
| Noise Level            | < 76 dB                  |
| Installation Type      | Indoor                   |
| Installation Altitude  | ≤ 1000 m                 |

### Features:

- Concealing structure to save space.
- Adjustable length of supporting, suit for various type of vehicles.
- Import hydraulic and electrical component from Italy.
- Own manual descent device when power off.

### Product Size:
